

# Movement Sensor

## Movement Sensor for downdraft table

### Description

Automatic start/stop device based on movement sensor, to be mounted on top of the back panel or backdraft panel of a downdraft table. After detecting any movement above the work grid, the automatic start/stop device activates the fan of the downdraft table to start running. When the work has stopped, the fan automatically switches off after a certain run-out period. The cable is to be connected at the rear.
