

Side Panels

Side Panels for downdraft table

Description

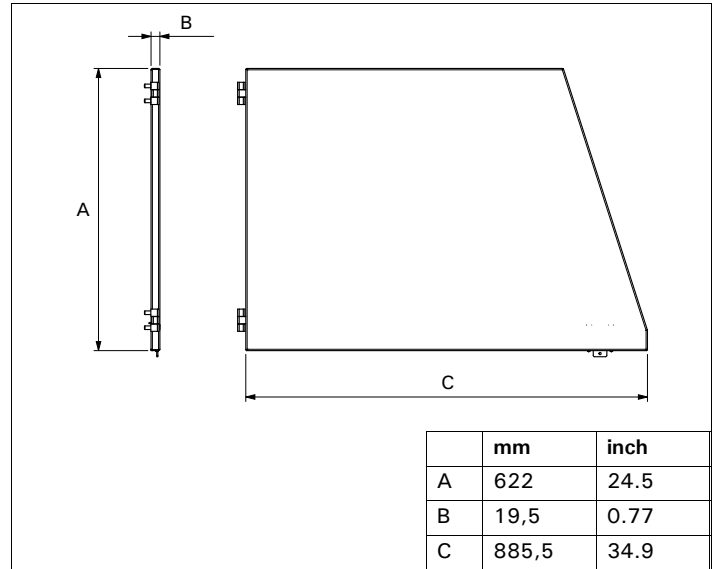

Side Panels to improve the extraction effectiveness by reducing the influences of draught. They also prevent tools, metal and other parts to fall beside the downdraft table. They are swivable to accommodate large workpieces.

The Side Panels consist of hinged trapezium-shaped sheet metal plates and have to be used in combination with the backdraft kit or back panel. They are to be mounted on the sides of the downdraft table.
