

|  |     |                                 |
|--|-----|---------------------------------|
| Filter type                              | (1) | DuraFilter® with SurfacPlus®    |
| Filter surface area                      |     | 50 m <sup>2</sup>               |
| Filter efficiency                        |     | up to 99,8%                     |
| Filter performance according to DN 24185 |     | EU 9                            |
| Aluminium spark arrester                 | (2) | standard                        |
| Filter pollution indicator               |     | standard                        |
| Max. capacity                            |     | 1250 m <sup>3</sup> /h (FAN 28) |
| Power consumption                        |     | 0 W                             |
| Net weight                               |     | 30 kg                           |
| Dimensions (L x W x H)                   |     | 730 x 810 x 900 mm              |
| Available power supply                   |     | no voltage required             |
| Suitable fan type                        |     | FAN 28                          |
